Job Description:

As a Software Developer Intern at AFI Digital Services, you will work closely with our experienced development team to learn and apply industry best practices while gaining hands-on experience in software development. Your primary responsibilities will include:

1. **Coding and Development:** Collaborate with team members to design, develop, and maintain software applications and features. Write clean, efficient, and well-documented code using languages and frameworks such as [mention relevant programming languages or technologies].
2. **Testing and Debugging:** Assist in testing and debugging software applications to ensure they meet quality and performance standards. Identify and resolve software defects and issues.
3. **Collaboration:** Work closely with cross-functional teams, including product managers, designers, and quality assurance, to understand project requirements and deliver high-quality software solutions.
4. **Problem Solving:** Analyse complex problems and propose innovative solutions. Contribute ideas and insights to improve existing software systems.

5. Research and Learning: Stay up-to-date with the latest industry trends, technologies, and best practices in software development. Continuously expand your knowledge and skills.

6. Documentation: Create and maintain technical documentation, including code comments, system architecture diagrams, and user guides.

7. Code Reviews: Participate in code reviews to learn from feedback and improve your coding skills. Provide constructive feedback to team members.

8. Adherence to Coding Standards: Follow coding standards and best practices to ensure code consistency, maintainability, and scalability.

#### Qualifications:

To be successful in this role, you should possess the following qualifications:

- Enrolled in a Bachelor's or Master's degree program in Computer Science, Software Engineering, or a related field.
- Strong passion for software development and a desire to learn and grow in the field.
- Familiarity with programming languages and technologies (mention specific languages, frameworks, or tools relevant to your company).
- Problem-solving skills and the ability to think critically.
- Strong communication and teamwork skills.
- Attention to detail and a commitment to producing high-quality code.
- Ability to work independently and collaborate effectively in a team.

#### Benefits:

- Hands-on experience in a real-world software development environment.
- Mentorship and guidance from experienced developers.
- Opportunity to work on challenging and meaningful projects.
- Exposure to cutting-edge technologies and tools.
- Networking opportunities within the industry.
- Potential for future employment opportunities upon successful completion of the internship.

#### How to Apply:

To apply for the Software Developer Intern position at AFI Digital Services, please submit your resume and a cover letter explaining your interest in the role and relevant

qualifications. Additionally, if you have a portfolio or examples of your coding projects, please include them.
